

**MLUG**  
Midlands LabVIEW User Group

## Coding Challenge

This coding challenge is for people to develop a VI that can be discussed in a “show and tell” session in the next user group.

Please can anyone that participates send their code to [mlug@argentaconsult.com](mailto:mlug@argentaconsult.com) so that we can prepare the material for the “show and tell”.

### The Challenge

I went to the supermarket to get some beers for the Euros final and my bill came to £11.99. With the money detailed in [this excel spreadsheet](#), how many combinations are there that make up the exact change to pay my bill?

**All participants will receive a prize for entering!**
